\$18.00 USD/\$23.95 CAD  
448 pages  
Trade Paperback  
Social Science / Popular Culture  
Carton Qty: 20  
9 in H | 6 in W

**Summary:** Gay bars have been closing by the hundreds. The story goes that increasing mainstream acceptance of LGBTQ+ people, plus dating apps like Grindr and Tinder, have rendered these spaces obsolete. Beyond that, rampant gentrification in big cities has pushed gay bars out of the neighborhoods they helped make hip. *Who Needs Gay Bars?* considers these narratives, accepting that the answer for some might be: maybe nobody. And yet...

Carton Qty: 20  
9 in H | 6 in W

**Summary:** There is no CEO task more significant than leading change in an organization whose old business model needs updating. Large-scale change involves rethinking how to engage customers, partners and suppliers with new technology and hard decisions about how to reorganize internal operations—plus the challenges of executing the transformation. The stakes are high, filled with risk and reward obvious to all...and it often fails. Why? Most organizations aren't built for change—they're designed...

**Summary: A thorough analysis of the right-wing interests contributing to the downfall of American democracy**

The war on American democracy is at a fever pitch. Such a corrosive state of affairs did not arise spontaneously up from the people but instead was pushed, top-down, by six private sector special interest groups—big business, the House Freedom Caucus, the Federalist Society, Fox News, white evangelicals, and armed militias. In *American Apocalypse* Rena Steinzor argues that these groups are n...

**Summary:** Seapower has been a constant in world politics, a tool through which powerful countries have policed the seas for commercial advantage. Political geographer Colin Flint highlights the geography of seapower as a dynamic, continual struggle to gain control of near waters—those parts of the oceans close to a country's shoreline—and far waters—parts of the oceans beyond the horizon and that neighbor the shorelines of other countries. A forceful and clarifying challenge to conventional accou...

This book offers a timely commentary on the dominant narratives and norms that shape the mindfulness industry, namely whiteness, postracialism and neoliberalism. At the same time, an emergent movement rooted in indigenous, Global South and queer knowledges is decolonising mindfulness and decentring ...

**Summary:** Disrupting white mindfulness presents a thought-provoking critique of the prevailing narratives that shape the mindfulness industry, namely whiteness, postracialism and neoliberalism.

The industry presents itself as 'apolitical', but this only serves to create institutions that fit comfortably into our increasingly divided societies. The White, middle-class profile of decision-makers, educators and staff is mirrored in its audiences, and the industry's whiteness is endlessly recycled thr...

A vivid account of the rise of terrorism in the late nineteenth century and the hysterical media response it provoked

**Summary:** In the dying light of the nineteenth century, the world came to know and fear terrorism. Like today, this was a time of progress and dread, characterised by political and technological breakthroughs and waves of immigration that swelled the populations of ever-expanding cities.

The era also simmered with political rage and social inequalities, which drove nationalists, nihilists, anarchists and republicans to dynamite cities and gun down presidents, police chiefs and emperors. This wave ...

*Mancunians: Where do we start, where do I begin?* is the authentic account of Manchester at the turn of the Millennium, told through a mixture of memoir and interviews with well-known local figures from music and sports.

**Summary:** In the late 1990s, Manchester was a city in upheaval. The devastation of the IRA bomb and the closure of the notorious Hacienda nightclub were seismic events that rocked the city's confidence at a time when identikit bands were flooding its clubs and bars, fuelled on anthemic guitar rock and swagger. Stereotypes were everywhere, while the spirit of Manchester was silently suffocating.

**Summary:** Welcome to the economy of algorithms. It's here and it's growing. In the past few years, we have been flooded with examples of impressive technology. Algorithms have been around for hundreds of years, but they have only recently begun to 'escape' our understanding. When algorithms perform certain tasks, they're not just as good as us, they're becoming infinitely better, and, at the same time, massively more surprising. We are so impressed by what they can do that we give them a lot of a...

**Summary:** The days when museums were dusty, stuffy institutions displaying their wealth and wisdom to a reverential public are over. Museums today are a cultural battleground. Who should decide what is put on display and how it is presented? Who gets to set the narrative? In this passionately argued book, Jon Sleigh maintains that museums must be for all people and inclusion must be at the heart of everything they do. But what does good inclusion look like in practice? Cleverly structured like a ...

**Summary:** Explores the impact of Jesuit missions on the development of Christianity in postcolonial French Africa, which found itself at the centre of major shifts and struggles within global Christianity and world politics.

At a time when most African countries were moving towards independence, the Vatican was speeding up the Church's indigenization agenda in an effort to secure its survival in sub-Saharan Africa. Yet, at the same time, African nationalism was on the rise and, following the colla...

**Summary:** Pioneering study of the role of the Christian churches in the Rwandan genocide of the Tutsi; a key work for historians, memory studies scholars, religion scholars and Africanists.

Why did some sectors of the Rwandan churches adopt an ambiguous attitude towards the genocide against the Tutsi which claimed the lives of around 800,000 people in three months between April and July 1994? What prevented the churches' acceptance that they may have had some responsibility? And how should we acco...

**Summary:** Essays considering how information could be used and abused in the service of heresy and inquisition.

The collection, curation, and manipulation of knowledge were fundamental to the operation of inquisition. Its coercive power rested on its ability to control information and to produce authoritative discourses from it - a fact not lost on contemporaries, or on later commentators. Understanding that relationship between inquisition and knowledge has been one of the principal drivers of it...

The Bowery was a synonym for despair throughout most of the 20th century. The very name evoked visuals of drunken bums passed out on the sidewalk, and New Yorkers nicknamed it "Satan's Highway," "The Mile of Hell," and "The Street of Forgotten Men." For years the little businesses along the Bowery—stationers, dry goods sellers, jewelers, hatters—periodically asked the city to change the street's name. To...

**Explores seven different approaches that the rabbis took towards intersex persons in their legal texts.**

**Summary:** This book explores the question: How did the rabbis of the first two centuries CE approach bodies that are born with variant genitals—bodies that they could not identify as definitely male or female? The rabbis had constructed a system in which every behavior was governed by one's sex/gender, posing a conundrum both for people who did not fit into that model and for the rabbinic enterprise itself. Despite this, their texts contain dozens of references to intersex.

### Summary: *Artificial Life After Frankenstein* brings the insights born of Mary Shelley's legacy to bear upon the ethics and politics of making artificial life and intelligence in the twenty-first century.

What are the obligations of humanity to the artificial creatures we make? And what are the corresponding rights of those creatures, whether they are learning machines or genetically modified organisms? In seeking ways to respond to these questions, so vital for our age of genetic engineering and a...

### Summary: Expert analysis of American governance challenges and recommendations for reform

Two big ideas serve as the catalyst for the essays collected in this book. The first is the state of governance in the United States, which Americans variously perceive as broken, frustrating, and unresponsive. Editor James Perry observes in his Introduction that this perception is rooted in three simultaneous developments: government's failure to perform basic tasks that once were taken for granted, an acce...

**Centers the insights of twelve urban tenth-grade Black and Latinx students about how schools marginalize them for not adhering to the school's systemic whiteness, while incisive critiques about school and society.**

**Summary:** Angel, a Black tenth-grader at a New York City public school, self-identifies as a nerd and likes to learn. But she's troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas, presenting a sugar-coated image of the United States that is at odds with her everyday experience. **Reconstructs José Ortega y Gasset's political theory, underscoring its distinctive historical origins as well as the ways in which it might be instructive to us today**

**Summary:** José Ortega y Gasset (1883–1955) was a Spanish philosopher and essayist best known for *The Revolt of the Masses*, first translated into English in 1932. In it, Ortega critiques a populist deformation of democracy by the rise of a "mass mentality" characterized by selfishness, a lack of curiosity, and a general indifference to the opinions and attitudes of others. However, as Brendon Westler makes clear, we need to look beyond Ortega's arguments about populism and democracy in his most fa...

**Summary:** The story of the driver is the story of Atlantic slavery. Starting in the seventeenth-century Caribbean, enslavers developed the driving system to solve their fundamental problem: how to extract labor from captive workers who had every reason to resist. In this system, enslaved Black drivers were tasked with supervising and punishing other enslaved laborers. In *The Driver's Story*, Randy M. **NEW IN PAPER**

**Summary:** Four years before the publication of the First Folio, a group of London printers and booksellers attempted to produce a "collected works" of William Shakespeare, not in an imposingly large format but as a series of more humble quarto pamphlets. For mysterious reasons, perhaps involving Shakespeare's playing company, the King's Men, the project ran into trouble. In an attempt to salvage it, information on the title pages of some of the playbooks was falsified, making them resemble leftov...

**Summary:** In *Fictions of Consent* Urvashi Chakravarty excavates the ideologies of slavery that took root in early modern England in the period that preceded the development of an organized trade in enslaved persons.

Despite the persistent fiction that England was innocent of racialized slavery, Chakravarty argues that we must hold early modern England—and its narratives of exceptional and essential freedom—to account for the frameworks of slavery that it paradoxically but strategically engendered. ...

**An exploration of five key moments of song performed, overheard, and remembered in Proust's novel.**

**Summary:** In *Proust's Songbook*, Jennifer Rushworth analyzes and theorizes the presence and role of songs in Marcel Proust's novel *À la recherche du temps perdu* (*In Search of Lost Time*). Instead of focusing on instrumental music and large-scale forms such as symphonies and opera, as is common in Proust musical studies, Rushworth argues for the centrality of songs and lyrics in Proust's opus. Her work analyzes the ways in which the author inserted songs at key turning points in his novel and how he...

**Summary:** In *Coterie Poetics and the Beginnings of the English Literary Tradition*, R. D. Perry reveals how poetic coterie formed and maintained the English literary tradition. Perry shows that, from Geoffrey Chaucer to Edmund Spenser, the poets who bridged the medieval and early modern periods created a profusion of coterie forms as they sought to navigate their relationships with their contemporaries and to the vernacular literary traditions that preceded them.

Rather than defining coterie sole...

### Summary:

#### Architecture Is Education

Education in architecture is a driving force behind the sustainability principles endorsed by the Global Award for Sustainable Architecture. This book illustrates how education—with the core element of knowledge transfer—aligns with the principles of the award through four key educational categories, and how the methodological approaches of the winners relate to these categories.

Education can contribute to sustainability and positively influence the future outcome in...

**Summary:**

**(English / German Edition)**

Felice Rix-Ueno studied under Josef Hoffmann, a co-founder of the Wiener Werkstätte (1903-1932). Inspired by the Japanese formal language, she formed her own style, which was expressed in particularly imaginative fabric and wallpaper patterns, fashion and home accessories, and wall paintings. After her marriage to the Japanese architect Isaburo Ueno, she moved to Japan in 1926. Here they created joint works that received much attention, such as the Star Bar in K...

**Summary:** Tense spaces: Towards an expanded concept of architecture

The first issue of the interdisciplinary periodical *forA on the Urban* explores the open, multilayered, interconnected, complex, and unbridled nature of urban design. Through eleven contributions from eighteen international experts on architecture, art, social criticism, and activism, this issue illuminates specific realities of fraught spaces – urban frictions – in different parts of the world.

Everyday frustrations, manifest inequ...

**Summary: Most of the embodied energy can be saved in the load-bearing structure!**

*Conceptual Design of Structures* is working at the interface between structural engineering, architecture, and art. The book seeks to answer the complex question of what needs to be considered when conceiving a building structure. What influences the process of conceptual thinking? How do space and structure interact? In what ways do architects and engineers work together? The book thus sheds light on the topic of mul...

**Summary:** Conservation laws, reflecting the symmetry of space and time, play a vital role in understanding the surrounding world. Conservation laws allow us to explain very different phenomena from a unified point of view. The textbook illustrates this principle taking examples from mechanics, optics, nuclear physics, solid-state physics, and medicine. They include, for example, positron annihilation used in experiments aimed at neutrino registration and in the positron emission tomography for pa...

**Summary:** How can time become festive? How do festivals manage to make time 'special', to mark out a certain day or days, to distinguish them from 'normal', everyday time, and to fill them with meaning? And how can we reconstruct what festive time looked like in the past and what people thought about it?

While a lot of research has been done on festivals from the point of view of several scholarly disciplines, the specific temporality of festivals has not yet attracted sufficient attention. In thi...

**Summary:** The trope of humans being 'replaced' by 'AI' is one of the most familiar examples of the rhetoric of replaceability. Not only have questions about what is unique and what is replaceable gained momentum in digital culture, but notions of 'fungibility' have emerged in many other contexts as well such as ecology, management theory, and, more sinisterly, in racist and conspiracist thinking. This volume argues that there is a 'replaceability paradigm' at work throughout the culture of modern...

**Summary:** In research on Information Structure, there is an ongoing discussion about the role of contrast. While most linguists consider contrast to be compatible with both focus and topic, some argue that it is an autonomous IS category. Contrast has been shown to be encoded by different linguistic means, such as specific morphemes, adverbials, clefts, prosodic cues. Hence, this concept is also related to other domains, in particular morphosyntax and prosody. The precise way in which they interact...

**Summary:** Homosexuals were mustered out of military service in the Bundeswehr until 1979, after which homosexuality alone was no longer considered grounds for unsuitability. But for homosexual soldiers, military service was an option, but a career was not – they were generally unable to progress to the rank of officer. Storkmann uses interviews, court files, and internal documents to examine the Bundeswehr's approach toward homosexual soldiers.

As space conditions perception, the analysis of relationships between image and space is highly significant. The current popularity of immersive spaces proves the strong affective potential of space and forms part of a long art historical tradition, upon which this volume offers critical reflection. Building on the methodological considerations inspired by the "spatial turn" and the "pictorial turn," the authors bring together approaches from image and architectural st...

Although Concrete Art comes across as very precise, it is only possible to say approximately when the name was born. In his manifesto of the same name, Theo van Doesburg officially introduced the term to art theory in 1930. But the Dutch artist, architect and theorist is said to have conceived it for the first time and applied it to his own works as early as 1924. 100 years later, despite all the uncertainty, this anniversary is a fitting opportunity to question today'...

Francis Bacon's portrait of his first partner Peter Lacy is somehow simultaneously attractive and repulsive. The monumental portrait dating from 1962 was unknown to the public for a long time. Shortly after it was painted, Italian film director Michelangelo Antonioni acquired the work and it remained in private hands for decades. This is a key work, created at a turning point in Bacon's oeuvre. Markus Rath embeds the painting into Bacon's visual world for the first time...

**Summary:** Japan presents a unique context for conducting queer studies. Unlike Europe, North America, and other regions of the world, it is said to lack homophobia due to the absence of Christianity as moral foundation. Furthermore, the situation of LGBTQ+ people has changed rapidly over the past ten years, as the Tokyo Olympics provided another impulse for discussions about sexual minority rights. As a result, recent surveys show a dramatic increase in the acceptance of same-sex marriage.

GAM's twentieth volume is dedicated to the search for the everyday in architecture. Its title, "The Infraordinary," refers to an artistic concept first used by Paul Virilio and Georges Perec: In the 1970s, they introduced the term *l'infra-ordinaire* to describe the habitual and ordinary--the opposite of the extraordinary. With this in mind, GAM 20 aims to delve more deeply into the unexceptional in architecture....

**Summary:** Decentralized finance (DeFi) is a rapidly growing field in fintech, having grown from \$700 million to \$100 billion over the past three years alone. But the lack of reliable information makes this area both risky and murky. In this practical book, experienced securities attorney Alexandra Damsker explains DeFi's role in both blockchain and finance.

Ideal for developers looking to build decentralized applications (DApps), this book compares DeFi to traditional bank-led fintech and explains...

**Summary:** Perimeter defenses guarding your network aren't as secure as you might think. Hosts behind the firewall have no defenses of their own, so when a host in the "trusted" zone is breached, access to your data center is not far behind. This practical book introduces you to the zero trust model, a method that treats all hosts as if they're internet-facing, and considers the entire network to be compromised and hostile.

In this updated edition, the authors show you how zero trust lets you focus...
